PROJECT

Stage

Designed the UX/UI for Stage, a web-based discussion forum where users can ask questions and interact with each other, and contributed to the front-end development.

Coding Platform ProJect

Primarily responsible for front-end development and supported UX/UI design for a programming website with a multi-language automatic answer checking system. The project won the first prize.

POS System Website

Managed document workflows, coordinated team schedules, and ensured project milestones were met on time for POSystem Website, a restaurant management system.
